I am a Sound Recordist / Mixer. I love community, positive action and the absolute wonders of the everyday. For me it's really exciting to collaborate with fellow creatives and professionals using my sound skills and tools to make inspiring ideas a reality.

Moving on from a previous career in corporate IT and moonlighting as a gigging songwriter/singer, I went back to school to study Audio Engineering at SAE, London (2012) and have never looked back. Now with more than 4 years experience working with sound and recording for film and music, with membership at the Institute of Professional Sound.

I bring to every project a wealth of organised and focused energy as well as my respect and admiration for artists from my own experience as a creator and performer.

---
